

Energy Resources Mini-documentary Assignment

Earth Science

Objective: Through the lens of a documentary video, your group will shine a light on a pertinent issue associated with energy in the context of Earth Science. Your video should be informative and contain appropriate, accurate science principles.

Specifics:

- Your group can choose any pertinent issue associated with energy (e.g. fossil fuels, alternative fuels, etc.)
- Your video may have any focus you wish (e.g. global, national, local)
- Your video **MUST** have a Call to Action
 - Call to Action: Something your viewers can do to solve a problem brought up by your video
- Get creative! This assignment sheet is short for a reason. This is your group's opportunity to showcase your creativity and talent. Make this interesting for your viewers.

Evaluation:

___/ 10 **Length** of video is 5-10 minutes

___/ 20 The **science** in the video is sound (Thoroughly research your chosen topic!)

___/ 20 The video is creative, interesting, and contains a **Call to Action**

Total: ___/ 50
